

VLM Robotics is a supplier of agile robotic manufacturing solutions. Its robotics helps industrials to adapt their production to agility, allowing them to produce unique parts or small fragmented batches of personalized products.

OUR 3 ACTIVITIES

VLM-Robotics is a robotic manufacturing machine supplier. It manufactures parts on demand and also has regularly a cooperative R&D activity with large end-users.

OUR SOLUTIONS

- **Agile or advanced robotics** to manage your fragmented productions, unique pieces
- **Multifunction & multiapplication** to complete the manufacturing of your large products
- **Turnkey machine** with its digital thread
- **Solution to avoid "4D jobs"** : Dirty, Dumb, Difficult or Delicate tasks
- **Scalable / reconfigurable**
- **Data traceability and securised manufacturing**

CHOOSE YOUR APPLICATIONS

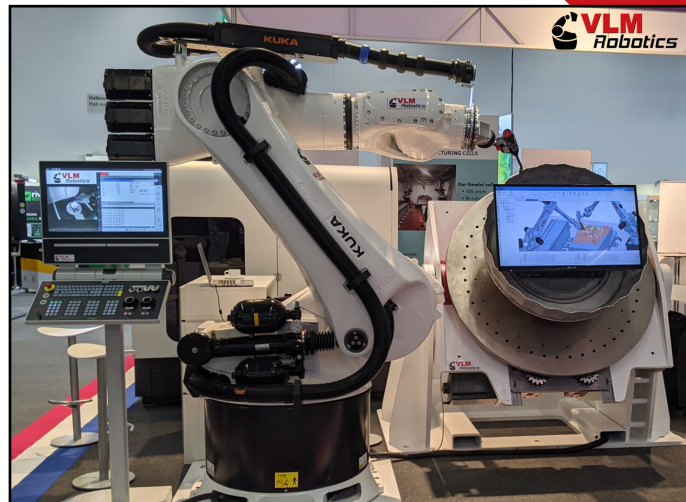

VLM ROBOTICS' MODELS

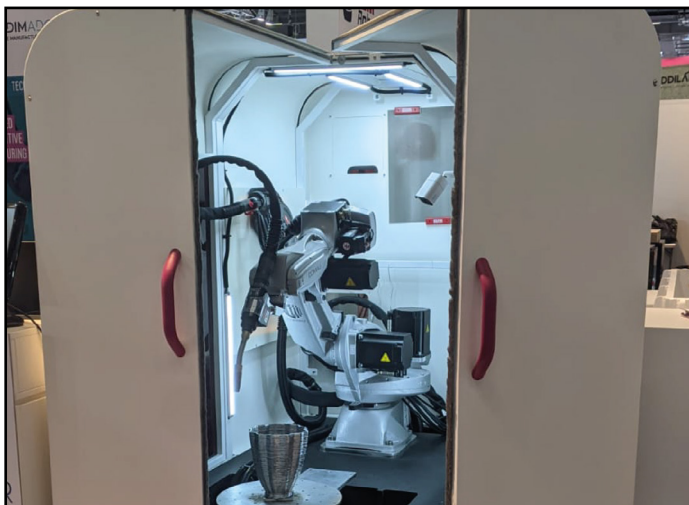

GEMINI model

- XXL L < 10m* & Diameter < 3m
 - 2 robots
 - NC in Direct Control in Multicanal
 - overload turning table (3-20 tons)
 - 14 axis up to 19 axis with option* linear axis
- LMP p & w or WAAM or Coldspray, Control in process, Milling

SOLO model

- XXL L < 5m & Diameter < 3m
 - 1 robot
 - NC in Direct Control
 - overload turning table (3-20 tons)
 - 9 axis
- WAAM, Coldspray, Metrology, Milling

COMPAQT model

- XL < 1,5 m High & Diameter
 - 1 robot
 - NC in Direct Control in Multicanal
 - Turning table 2 axis 500 kg
 - 9 axis
- WAAM, Scan, Milling

CALYPSO model

- 1 mobile robot (AMR)
 - NC in Direct Control in Multicanal
 - Omnidirectional
 - 8 axis
- Welding or WAAM or FDM or Scan or NDT
